

**THE
PEOPLE'S
MARCH**

**FOR THE
CLIMATE**

**EDINBURGH
28
NOV**

On the eve of major climate change talks in Paris, people from all walks of life and from every corner of the globe will come together to show there is huge public support for ambitious climate action.

From Edinburgh to Sao Paolo, from Johannesburg to Paris, we'll rise together for the love of creation.

**Millions of us hold a vision of a better future:
a future free from poverty and climate change.**

This is our chance to share that vision and call for climate action so that all God's people can be released to live life in all its fullness.

Be part of something amazing,
join the **People's March for the climate.**
