

Global Explorers

Technical information

Technical support

The more of these recommendations your machine meets, the smoother Global Explorers website application will run.

Recommended system requirements:

- Computer: PC/Mac
- Operating System: Windows 2000/XP/Vista/Linux (24 bit only)
- Processor: Intel Pentium 4 1.6Ghz speed (1.8Ghz for Vista)
- Memory: 512MB RAM
- Video/graphics card: 32MB
- Integrated sound card

Supporting software:

- Flash Player version 9 – go to <http://get.adobe.com/flashplayer/> if you need to upgrade your version of Flash.
- Adobe Acrobat Reader 5.0 or higher for PDFs – go to <http://get.adobe.com/reader/> to download.

Making the most of Global Explorers on your whiteboard:

- The globe control panel is moveable to enable you to position it best for left- or right-hand use.
- Check your whiteboard configuration and set-ups if you are experiencing difficulties using Global Explorers.
- If the problem persists, please email us at schools@christian-aid.org putting Global Explorers in the subject and details of the difficulty in the body of the email.
